

To Our Valued Customers,

Milescraft currently has a small number of metric items that share a UPC code with their imperial versions. These products ship in the same packaging, and have check boxes indicating which version of the product is inside the box. To alleviate issues that occur with UPC differentiation for customers that purchase both the metric and imperial versions, Milescraft will now place new, unique, UPC stickers over the existing printed UPC on the metric versions. The product boxes will not change and the check marks will remain indicating which version of the product is packaged. For customers purchasing the 1316 & 1366 CabinetMate, we will introduce new packaging and these items will not be stickered. Small changes will be made to highlight the differences between the imperial and metric versions.

<b>Metric</b>	<b>Description</b>	<b>Current UPC</b>	<b>New UPC</b>	<b>Current Inner Carton GTIN</b>	<b>New Inner Carton GTIN</b>
12780004	MetalBushingSet (Metric)	737888122806	737888127801
